

NRMCA Pervious Concrete Contractor Certification Course

Program Summary

This program is designed to educate, train and certify concrete finishers in pervious concrete placement. Ohio Concrete engineers will provide a half day classroom training necessary for the knowledge in pervious concrete materials and proper placement procedures in preparation for the written 'Technician' examination following the training.

NRMCA can provide certification on these following three (3) levels:

A Pervious Concrete **Technician** is a person who demonstrated knowledge about proper procedures to place, compact, finish, edge, joint, cure and protect pervious concrete pavements, but who lacks the requisite field experience to qualify as a pervious concrete Installer or Craftsman.

A Pervious Concrete **Installer** is a person who has demonstrated the ability to place, compact, finish, edge, joint, cure and protect pervious concrete pavements and has documented a limited project-based field experience in placing pervious concrete. Ohio Concrete must certify that the contractor has successfully installed a minimum of three projects with a total area exceeding 10,000 SF of Pervious Concrete. The Installer must possess a current ACI Flatwork Finisher Technician or Craftsman certification and successfully complete the performance evaluation at the time of application.

A Pervious Concrete **Craftsman** is a person who has demonstrated the ability to place, compact, finish, edge, joint, cure and protect pervious concrete pavements and has documented a higher level of field time-based experience in placing pervious concrete. In addition to the above Installer requirements, the Craftsman must either provide documentation of 3000 hours of pervious concrete experience or complete the performance evaluation and document 1500 hours of experience.

Certification Requirements

The "closed book" **written examination** is allotted two hours to complete and consists of approximately 50 multiple-choice questions. The passing grade for the written examination is 75% During the **performance evaluation**, each examinee must demonstrate procedures for placing, compacting, finishing, edging, jointing and beginning curing a pervious concrete slab. The examiner will observe and evaluate the techniques used and record passing or failing grades on the various procedures. A passing grade is defined as "no significant variation from proper procedure and no more than two variations from proper technique in the use of the tools."

Recertification is required every five years and requires successful completion of a written examination.

ACI Standard Contractor Qualification (ACI 522.1-08)

The Contractor shall employ no less than; 5 NRMCA certified Pervious Concrete Technicians or 3 NRMCA certified Pervious Concrete Installers or 1 NRMCA certified Pervious Concrete Craftsman - as members of each placement crew.

NRMCA Pervious Concrete Contractor Course

2010 Registration Form

Date: Wednesday, January 13, 2010

Time: 8:00 a.m. - 2:00 p.m.

Location: Garber Bros.
7805 Arcanum-Bears Mill Rd
Greenville, OH 45330

Course Fee : **ORMCA Member**
\$250 (includes workbook, course, full exam)

Non-member
\$500
